A PROJECT SYNOPSIS ON

"SPORTS MERCHANDISE MANAGEMENT SYSTEM"

Submitted In Partial Fulfilment Of The Requirement For The Award Of The Degree Of VI Semester BCA, Bangalore University

A Project Synopsis By:

LIKITHA R—(U03JH23S0006)

UNDER THE GUIDANCE OF

Asst prof.RENUKA KHEDAGI

"DEPARTMENT OF COMPUTER SCIENCE"

2025-2026

INTRODUCTION

Sports Hub is a modern e-commerce platform designed to provide a seamless online shopping experience for sports merchandise. The platform offers a wide range of products including jerseys, sports equipment, footwear, accessories, and fan merchandise from various sports categories such as Football, Cricket, Basketball, Tennis, and more.

The system is designed to serve customers, sellers, and administrators, efficient inventory management, and smooth order processing. It provides a personalized and user-friendly shopping experience with features like product search, order tracking, and customer reviews.

What sets Sports Hub apart is its real-time inventory tracking, secure and role-based management system, ensuring reliability, performance, and scalability.

FEATURES

➤ Wide Range of Sports Merchandise

➤ Secure User Authentication

➤ Advanced Product Search & Filters

➤ Shopping Cart & Wishlist

➤ Secure Online Payment Integration

➤ Order Tracking System

➤ Seller & Admin Dashboard

➤ Review & Rating System

➤ Responsive and User-Friendly Interface

SDLC DETAILS

The model used for the sports merchandise management system website/app is water fall model which follows a sequential approach where each phase is completed before moving to next.

1.REQUIREMENT ANALYSIS

- Identify project goals (Sports Merchandise E-commerce Platform).
- Define user roles (Customers, Admin, Vendors – optional).
- List core functionalities:
- ✓ Product listing and categorization.
- ✓ Shopping cart and checkout system.
- ✓ Order management and tracking.
- ✓ Admin inventory control.

2. SYSTEM DESIGN

- UI/UX Wireframes for intuitive shopping experience.
- Database Schema: Tables for Users, Products, Categories, Orders, Reviews.
- System Architecture:
- Frontend: HTML, CSS, JavaScript
- Backend: Node.js / Python (Django).
- Database: MySQL / MongoDB
- Tools: VS Code,Web Browser

3. Implementation (Development)

- Develop responsive frontend UI.
- Implement backend APIs for product management, cart, checkout, and order processing.
- Connect database and ensure secure data handling.

4. Testing

- Unit Testing: Test individual modules (Login, Cart, Checkout).
- Integration Testing: Ensure seamless interaction between frontend and backend.
- System Testing: Verify complete system functionality.
- User Acceptance Testing (UAT): Validate usability and performance.

5. Deployment & Maintenance

- Deploy on hosting platforms (AWS, Firebase, Heroku).
- Monitor website performance and security.
- Regular updates and feature enhancements.
- Bug fixing and system optimization.

MODULE DETAILS

1. User Management Module

➤ Features:

- User Registration & Login (Role-based access).
- Profile management.
- Address management.
- Order history tracking.

2. Product Management Module

➤ Features:

- Add, update, delete products (Admin).
- Product categorization (Sport, Brand, Price).
- Product search and filtering.
- Stock availability management.

3. Cart & Checkout Module

➤ Features:

- Add/remove products from cart.
- Apply discount coupons.
- Secure checkout process.
- Multiple payment options (UPI, Card, Net Banking).

4. Order & Payment Module

➤ Features:

- Order confirmation and invoice generation.
- Payment status tracking.
- Real-time order tracking.
- Return & refund management.

5. Admin Dashboard Module

➤ Features:

- Manage users and products.
- Monitor sales reports and analytics.
- Inventory and stock management.
- View customer feedback and ratings.

SYSTEM SPECIFICATIONS

1.Software Requirement

- Frontend:HTML5,CSS3,JavaScript,Bootstrap.
- Backend:PHP / Node.js / Python (Django/Flask)
- Database:MySQL / MongoDB
- Tools:VS Code / Sublime Text
- XAMPP / WAMP Server
- Web Browser (Chrome, Firefox, Edge)

2. Hardware requirement

- Processor: Intel i3 or higher
- RAM: Minimum 4GB (8GB recommended)
- Hard Disk: 250GB or higher
- Internet Connection

CONCLUSION

The Sports Merchandise E-Commerce Platform successfully demonstrates how modern web technologies can be used to create a reliable, scalable, and user-friendly online shopping system dedicated to sports products. The system integrates essential e-commerce functionalities such as product management, secure transactions, order processing, and user account management into a single, efficient platform.

This project highlights the importance of digital transformation in the sports retail industry. With the growing popularity of global sporting events like the FIFA World Cup, Indian Premier League, and the Olympic Games, fans increasingly prefer purchasing merchandise online due to convenience, variety, and competitive pricing. This platform addresses that demand by providing a seamless and secure shopping experience.
